

Y9 HISTORY

HISTORY AT YARDLEYS

INTENT: We aim to foster a passion for History to encourage students to become historians. Throughout their studies students will develop a good understanding of significant events in British history and aspects of world history, and how these impact the way we live today. Content is covered chronologically while revisiting themes such as power, protest, women, local history, wider world, empire and conflict. These first order concepts are analysed with second order concepts, such as causation, consequence, similarity and difference, chosen because they fit the content best. We aim for students to be involved in national conversations and provide context to wider understanding. Helping them explain the way the world is today

Y9 HISTORY

Based on the overall timeline of world and British history that students will have built from KS3, they will now be starting their GCSEs by looking back at British History. The Medicine units are structured chronologically and skills are repeated so that they can be reviewed with more depth each time they are covered.

YEAR 9

	Medicine Through Time – Medieval	Medicine Through Time – Renaissance	Medicine Through Time – 18th and 19th century	Medicine Through Time – Medicine on the Western Front	Medicine Through Time - Modern
SUBSTANTIVE KNOWLEDGE					
DISCIPLINARY KNOWLEDGE	Similarity & difference, change & continuity, causation	Similarity & difference, change & continuity, causation	Similarity & difference, change & continuity, causation	Evidence, interpretations	Evidence, similarity & difference, change & continuity, causation, interpretations
